	Controllers

Question For The Interview

Areas
Architecture of .Net Framework
Components of .Net Framework (CLR, CLS, CTS, FCL, Garbage collection, Assembly, Types of assembly etc.)
Polymorphism
Difference between Interface and Abstract Class
Difference between value type and reference type
Page Life Cycle , Application Life Cycle
Event Handlers
Data Controls, Validation Controls, Ajax Controls, Navigation Controls, Form Controls

Types Of Validators and there use

ViewState
QueryString
Application
Session Management
Cookies
Authentication
Authorization

Architecture of ADO. Net

Connection, Commands (ExcuteScalar, ExcuteReader, ExcuteNonQuery)

DataAdapter, Dataset, DataReader
RDBMS
Constraints-Primary Key, Referential Integrity, Not NULL, Check, Unique Key
ACID Properties
JOINS, Types Of Joins
Indexes
Stored procedures, tables, aggregate functions
UDF (User defined Functions)
How to access controls using JavaScript?
How to set style?
How to show alerts and confirmation box?
how to write function? Low level
events in JavaScript

Selectors
events
how to set style
How to run some code on page load?
Attributes used to set font, font size, style.
how to write css class
What is purpose of . & # in css.
Mention a few css3 properties (border-radius, transition, transform etc.)
Explain mvc pattern.
How can you implement master page (like aspx)
Difference between strongly typed views and dynamic views
What is partial view and when should it be used.
What are sections
How to create editor templates
How to implement validation
What type of validations are there
How to use editor templates?
Different types of ActionResult returned from controller (JsonResult, ViewResult, PartialViewResult, ScriptResult, FileResult etc.)
How to restrict action to HttpPost / HttpGet etc?
What other types of common attributes are available for actions
